MORRIS

COUPLING COMPANY

Serving the pneumatic conveying industry with a complete line of precision quality coupling and tubing products, enabling you to purchase all of your needs from one source. And, on-time delivery performance, enabling you to meet your schedule.

Morris Coupling Company

Ordering Information

When ordering couplings, first determine the pipe size (IPS) or tube diameter (OD), choose the appropriate gasket material, decide whether or not you need a gasket protector or grounding strip (stainless steel or aluminum), and then select the corresponding coupling for your application. Always state the *outside diameter* of the pipe or tube, the size code number, and the price. If you prefer to use our computer PIC number designation, see page 21 for a complete explanation.

Terms

1% 10 Days, Net 30 Days.

F.O.B. Point

Factory

- Coupling Products, Repair Clamps – Erie, PA
- Tubing Products, Sight Glasses – Knoxville, TN

Shipments

All orders should specify method of shipment. In the absence of instructions, shipments will be made at the company's discretion. If special routing is desired, this should be stated. If post office and shipping point addresses differ, both should be given. Orders are accepted with the express understanding that Morris Coupling Company will not be liable for any losses or damages resulting from any delays in shipment or delivery due to any cause whatsoever.

Orders, Contracts and Agreements

All orders and contracts taken by representatives of agents, or received direct, are subject to acceptance by the company at Erie, Pennsylvania.

Quotations

All quotations are valid for acceptance within 30 days unless otherwise noted.

Minimum Order

The net minimum billing is \$50.00.

Returned Material

No merchandise can be returned without prior consent of the company. All returned shipments must be accompanied with a completed Customer Return Authorization form clearly identifying the name and address of the sender. In the event any material is returned for credit, a restocking charge will be made, plus a charge for reconditioning where necessary. All products being returned must be new and in resaleable condition.

Special Products or Material

All non-stock items and special products or materials *are not returnable*.

Warranty

We warrant the goods to be free from defects in material and workmanship as represented in our catalogs or applicable drawings and specifications agreed to by us at the time of acceptance of the order by Morris Coupling Company. Our obligation under this warranty shall be limited to repairing or replenishing any parts which shall, within one (1) year after shipment to the original purchaser, be demonstrated to be defective. This warranty is expressly in lieu of all other warranties, express or implied, including the warranties of merchantability and fitness for application. No person, firm or corporation is authorized to assume for us any other liability in connection with the sale of these goods.

Compression Couplings For Tubing And Pipe

The Morris Compression tubing and pipe coupling is designed for permanent installation in the joining of either plain end, threaded, grooved or a combination of any of these joints. The band type construction holds the entire surface of the joint in uniform compression.

Couplings are made of heavy-gauge zinc-plated

steel...prices of aluminum or stainless-steel couplings quoted on request.

Gaskets furnished standard in red rubber or black neoprene...please specify. Gaskets also available in white neoprene and a variety of other materials at a slight extra charge.

Condensed Table Of Specifications

SIZE	Thickness		
	Shell	Sleeve	Gasket
1/2" - 2-7/8" OD	.052	.052	.062
3" OD	.052	.052	.093

- WHEN ORDERING, always give the Code No. and O.D. of the pipe or tube on which coupling will be used.
- Prices for larger and/or special sizes available on request.

NOTE: When ordering GASKETS ONLY, please refer to page 6.

- (1) Same price applies for couplings with red rubber gaskets.
- (2) Stainless steel grounding strips are standard on all couplings. Aluminum grounding strips or couplings without grounding strips available at same price.
*Neoprene

Compression Couplings For Tubing And Pipe *continued*

To Prevent Static Electricity Build-up in Bulk Material Conveying Systems, specify Morris Compression Couplings with grounding strips. Be sure to state if your requirements call for aluminum or stainless steel strips. Stainless steel grounding strips are standard, aluminum grounding strips or couplings without grounding strips are available at the same price.

To Eliminate Gasket Wear, or contamination of material flowing through the system lines, specify Couplings with Stainless Steel GASKET PROTECTORS. (For prices, see page 4.)

- WHEN ORDERING, always give the Code No. and O.D. of the pipe or tube on which coupling will be used.
- Overall height of coupling, including flange, is coupling O.D. plus 2-3/4".
- **Tubing and pipe have same O.D. *Neoprene

- (1) Same price applies for couplings with red rubber gaskets.
- (2) Stainless steel grounding strips are standard on all couplings. Aluminum grounding strips or couplings without grounding strips available at same price.

Dual-Purpose Couplings For Tubing And Pipe

When higher pressures or applications requiring greater end-pull capabilities are encountered, these dual-flange couplings are recommended. Gasket is one piece with single row of interlocking teeth as illustrated. The outer shell with flanges and the inner sleeve are two pieces each. Dual-Purpose Couplings slide to position at the joint without removing the bolts ... or may be separated into halves for assembly around the joint.

Compression Couplings with Stainless-Steel Gasket Protectors

You can eliminate costly downtime and replacement of coupling gaskets in your vacuum conveying system.

Morris Gasket Protectors provide positive gasket protection against abrasion or corrosion with no adverse effect on Coupling capabilities. They prevent gasket wear which occurs when pipe or tubing ends do not butt completely. This gap is often unavoidable and always undetectable. In vacuum systems, gaskets without Protectors can be drawn into the line enough to cause excessive wear and eventual system leaks. This may result in undesirable contamination of the materials being handled.

Morris Couplings with Gasket Protectors fully eliminate these costly hazards to the effective and economical operation of vacuum conveying systems.

- Are factory assembled – no loose parts.
- Automatically compensate for field installation variations causing exposure of gaskets – prevent pinched gaskets at butt connections.
- Gasket Protectors are of Type 430 stainless steel with interlocking teeth – excellent for protection against abrasion and corrosion.
- For special corrosive applications, specify Teflon Gasket Protectors*.

Gasket Protectors are for use with Morris Compression Couplings only and are **not recommended for couplings less than 6" long.**

For Couplings with Gasket Protectors in sizes not listed at right, contact the factory.

All shipments are F.O.B. Erie, PA.

Prices subject to change without notice.

TO ORDER:

Order by Code No. and O.D. Specify "WITH STAINLESS STEEL GASKET PROTECTOR."

*Contact factory for prices of couplings with Teflon gasket protectors.

Side-Band Compression Couplings

The unique design of the Morris Side-Band Compression Coupling provides improved axial-force capability when connecting pipe and tubing. Side-band couplings are especially effective where line vibration is a problem.

The side-band coupling provides all the sealing advantages of the Morris compression coupling while providing enhanced end-pull capability.

Available for 1-1/2" through 24" nominal pipe or tubing sizes. Static grounding strips and stainless-steel gasket protectors also available.

(1) Same price applies for couplings with red rubber gaskets.

(2) Stainless steel or aluminum grounding strips are available at same price.

*Neoprene

- WHEN ORDERING, always give the Code No. and O.D. of the pipe or tube on which coupling will be used.
- Contact factory for prices of couplings with Teflon gasket protectors.
- Prices for larger and/or special sizes available on request.

Note: For Side-Band coupling length, add 8 inches to basic coupling length.

(1) Same price applies for couplings with red rubber gaskets.

* Neoprene

- Prices of other types of gasket material or for sizes not shown are available on request.
- All shipments F.O.B. Erie, PA.
- Prices subject to change without notice.

How To Order:

1. Specify: "REPLACEMENT GASKETS for Morris Compression Couplings."
2. Give coupling code number and O.D. of pipe or tube.
3. Give the length of original coupling (or number of bolts).
4. Specify material: Black or white neoprene, red rubber.
5. If you require grounding strips, specify aluminum or stainless steel.

Quickon II Couplers

STAINLESS STEEL

FOR PNEUMATIC OR VACUUM CONVEYING SYSTEMS

Morris Quickon II Couplers can be installed or removed with a twist of the wrist. No tools or special skills needed. The positive-locking system turns easily to seal or to compensate for normal O.D. pipe or tubing tolerances.

This in-line Coupler is ideal for use where fast takedown and reassembly of lines is essential; reduced coupler weight is desirable; a line or system is frequently modified or wrap-around installation is necessary.

Morris Gripper™ Couplers

The GRIPPER was devised as a quick coupler for dry, bulk transport, tank tubing. This unique coupling just slides onto the tubing or wraps around it and is tightened by hand in seconds, but it provides better support than rubber hose and band clamps. The GRIPPER's positive-sealing gum gaskets allow for tube and pipe variations. And, because it's made of 100% stainless steel, it will not corrode due to harsh weather or road conditions. Silicone gaskets that comply with applicable FDA requirements are available upon request.

All (A) Round Stainless-Steel Couplings/Repair Clamps

- To Join System Piping
- To Repair Piping

This spanner-type combination coupling and repair clamp offers many advantages. It is quickly and easily installed by slipping on, or wrapping around, the pipe. This is because the spanner and gasket are permanently attached to the band, creating, in effect, a one-piece coupling/clamp. The thick, resilient, Neoprene gasket assures a positive butt-joint seal. It accommodates surface variations such as encountered in cast iron and fiberglass piping. The spanner design eliminates the need for a separate inner sleeve. The stainless steel All (A) Round Coupling/Repair Clamp offers a lightweight and economical unit which is strong and durable.

Single-Type Repair Clamp

The **Morris Single-Type Repair Clamp** is suitable for the quick repair of minor leaks in all types of pipe. It consists of an outer shell of zinc-plated steel, together with a single-strip neoprene gasket. When other than steel clamps and neoprene gaskets are required, specifications should be stated on special order. Prices on other than stock sizes are available on request.

Morris PVC Flexible Hose

Four distinct types to meet varying application needs.

Morris offers material-handling hoses to meet the wide variety of bulk conveying system requirements which may be encountered. Flexible hose is suitable for both vacuum and pressure-discharge service.

Morris hoses are ideal for conveying pellets, granular material and powdery substances. Flexible hose offers a fast, convenient method of finishing a pneumatic conveying system.

Morris also offers clamps to help complete your installation.

MORR-CLEAR™ Economical Food-Grade PVC Transfer Hose

Our most popular material-handling hose features a clear PVC tube with a smooth bore to provide excellent material flow rates. A clear, rigid, external PVC helix reinforcement enables user to visually monitor flow of material.

High-density PVC materials are known for their ability to withstand abrasion. Hose construction provides good flexibility with light weight. Hose carries FDA “3A Dairy” rating. Operating temperature range from 10°F to 150°F.

MORR-CLEAR Number	I.D. (inch)	O.D. (inch)	Working Pressure (psi)	Vacuum Rating (inch HG)	Bend Radius (inch)	Weight (lbs./ft.)	Standard Coils (ft.)

MC600	6	6.72	30	10	29.4	2.20	25

MORR-CLEAR™ STATIC Food-Grade PVC Hose with Static-Dissipating Ground Wire

This is the same durable lightweight hose described above. The only difference is MORR-CLEAR STATIC contains an integral wire to assure a positive ground where static build-up is a concern.

MORR-CLEAR STATIC Number	I.D. (inch)	O.D. (inch)	Working Pressure (psi)	Vacuum Rating (inch HG)	Bend Radius (inch)	Weight (lbs./ft.)	Standard Coils (ft.)

MS600	6	6.72	30	10	29.4	2.20	25

Morris PVC Flexible Hose *continued*

MORR-THANE™

Extended Performance High-Density Polyurethane Transfer Hose

Hose is made from a high-density polyurethane formulation for extended life when handling abrasive materials. Hose has a smooth bore to provide excellent material flow rates. Corrugated construction provides good flexibility and light weight making hose easy to use. Hose remains flexible at sub-zero temperatures from -30°F to 150°F.

MORR-THANE Number	I.D. (inch)	O.D. (inch)	Working Pressure (psi)	Vacuum Rating (inch HG)	Bend Radius (inch)	Weight (lbs./ft.)	Standard Coils (ft.)
MT150	1.5	1.86	75	29	3.9	0.42	100

MT800	8	9.20	25	25	48.0	6.48	20

Standard MORR-THANE is blue. Upon request, it is available clear with static wire. Contact Erie for pricing.

MORR-TUFF™

Material Hose For Severe Service

MORR-TUFF is specifically designed for unloading pellets from rail cars, handling sand blast grit, and the transfer of grain and other severe applications.

MORR-TUFF is a blend of Nitrile, polyurethane and PVC that makes it flexible, lightweight and easy to handle – even in the large sizes. Compared to rubber and metal hoses, MORR-TUFF offers a low-cost alternative. The outer black cover is static dissipating and ozone resistant. Operating temperature from -30°F to 150°F.

MORR-TUFF Number	I.D. (inch)	O.D. (inch)	Working Pressure (psi)	Vacuum Rating (inch HG)	Bend Radius (inch)	Weight (lbs./ft.)	Standard Coils (ft.)

Morris Metal Flexible Hose

General Purpose Metal Flex Hose

This unlined general purpose hose features interlocked construction formed from a single metal strip. The balanced interlocking manufacturing process provides for maximum flexibility and longest service life. Pressure and vacuum capabilities may be easily enhanced by the selection of an appropriate packing material.

The unlined metal flex-hose is available in various alloys, metal strip thicknesses and in diameters from 1-1/2" through 8" I.D. Interlocked hose is available in any length and can be provided in bulk or fabricated assemblies.

Morris Metal Flexible Hose *continued*

Metal Smooth-Bore Flex Hose

This smooth-bore hose is ideally suited for dry-bulk pneumatic conveying. This hose is produced with a durable outer armor and a highly abrasion-resistant liner. A precision manufacturing process makes this hose unequaled in strength and flexibility. Pressure and vacuum capabilities may be easily enhanced by the selection of an appropriate packing material.

The smooth-bore hose is available in various alloys, metal strip thicknesses, and in diameters from 1-1/2" through 8" I.D. Smooth bore hose is available in any length and can be provided in bulk or fabricated assemblies.

Morris Custom-Fabricated Interlocked Hose Assemblies

State-of-the-art fabricating methods, combined with an extensive selection of Morris Ever-Tite® couplings, enable Morris to effectively supply any configuration of hose assemblies.

Typical end fittings include cam and groove connectors, pipe and tube nipples, flanges and hose shank adapters.

Maximum Steel and Fabrication Temperatures

Steel Type	Maximum Temperature	Fabrication Technique	Maximum Temperature
Stainless Steel	1,750°F	Welding	1,200°F
Carbon Steel	850°F	Brazing	700°F
Galvanized Steel	450°F	Epoxy	250°F

Note: Epoxy may be used with all metal types. However, applications are limited to 250°F service.

Pipe and Tube Bends for pneumatic systems, short and long radius

Tube Bending Capabilities

Pipe and tube bends of up to 180° are readily available in aluminum, stainless, carbon steel and galvanized in the sizes listed. Other centerline radii are available but not shown. Special shapes, 'U' bends, offsets, and bifurcated bends available upon request.

Morris tube bends are manufactured in our Knoxville, Tennessee, Plant.

Morris Pipe and Tubing Straights

Straight lengths of pipe and tubing are available in carbon steel, aluminum, and stainless – 1-1/2" O.D. thru 10" pipe in a variety of wall thicknesses.

ORDER BENDS by O.D., wall thickness, alloy, degree of bend, centerline radius and tangent.

WALL THICKNESS: 16 ga. (.063), 14 ga. (.083), and 11 ga. (.120) in tubing. Schedules 5, 10 and 40 pipe. Other wall thicknesses on request.

*Carbon Steel, Schedule 40 Only.

MATERIALS: Aluminum is 6063-T1 extruded. Stainless is T304 ASTM A312 for Pipe and T304 ASTM A249 for tubing. Carbon steel ASTM A53 for pipe; A513 for tubing. Galvanized A53 for galvanized coated. Pipe and A513 for galvanized-coated tubing.

ORDER TEES by tube or pipe size, wall thickness, and metal.

O.D.s not listed, available on request.

ORDER LATERALS and WYES by tube or pipe size, wall thickness, metal and degree of angle.

Sight Glasses

- clear look at the material flowing
- smooth “straight-thru” interior
- air-tight seal
- “sighting” section can be furnished in Pyrex

- a grounding strip, permanently attached, eliminates the build-up of static electricity
- fast, easy installation

TUBING OR PIPE INSERTED IN CLEAR ACRYLIC IN THE FOLLOWING SIZES:

Tubing Sizes with Aluminum Ends
