

# Morris PVC Flexible Hose

## Four distinct types to meet varying application needs.

Morris offers material-handling hoses to meet the wide variety of bulk conveying system requirements which may be encountered. Flexible hose is suitable for both vacuum and pressure-discharge service.

Morris hoses are ideal for conveying pellets, granular material and powdery substances. Flexible hose offers a fast, convenient method of finishing a pneumatic conveying system.

Morris also offers clamps to help complete your installation.

## MORR-CLEAR<sup>®</sup> Economical Food-Grade PVC Transfer Hose

Our most popular material-handling hose features a clear PVC tube with a smooth bore to provide excellent material flow rates. A clear, rigid, external PVC helix reinforcement enables user to visually monitor flow of material.

High-density PVC materials are known for their ability to withstand abrasion. Hose construction provides good flexibility with light weight. Hose carries FDA "3A Dairy" rating. Operating temperature range from 10°F to 150°F.

## MORR-CLEAR<sup>®</sup> STATIC Food-Grade PVC Hose with Static-Dissipating Ground Wire

This is the same durable lightweight hose described above. The only difference is MORR-CLEAR STATIC contains an integral wire to assure a positive ground where static build-up is a concern.

## MORR-THANE™

### Extended Performance High-Density Polyurethane Transfer Hose

Hose is made from a high-density polyurethane formulation for extended life when handling abrasive materials. Hose has a smooth bore to provide excellent material flow rates. Corrugated construction provides good flexibility and light weight making hose easy to use. Hose remains flexible at sub-zero temperatures from -30°F to 150°F.

Standard MORR-THANE is blue. Upon request, it is available clear with static wire. Contact Erie for pricing.

## MORR-TUFF™

### Material Hose For Severe Service

MORR-TUFF is specifically designed for unloading pellets from rail cars, handling sand blast grit, and the transfer of grain and other severe applications.

MORR-TUFF is a blend of Nitrile, polyurethane and PVC that makes it flexible, lightweight and easy to handle – even in the large sizes. Compared to rubber and metal hoses, MORR-TUFF offers a low-cost alternative. The outer black cover is static dissipating and ozone resistant. Operating temperature from -30°F to 150°F.
